PROJECT TOPIC: Protutor

Programme: MCA

Project Group Members:

1. **Divya Arora (B-15/12584200068)**
2. **Rashi Chaurasia (B-40/12584200154)**
3. **Unnati Gupta (B-52/12584200197)**
4. **Muskan Agrawal (B-28/12584200124)**

Project Supervisor: Mr. Nitish Bhardwaj, Assistant Professor

Objective: The objective of the ProTutor project is to develop an AI-powered platform that solves the problem of scattered learning resources by integrating study materials, doubt-solving, and practice tools into a single, easy-to-use system. The project aims to provide personalized academic support to students, making learning more efficient and organized.

Tools required:

- **Hardware Requirements:**
  - Processor Intel i3 or above
  - RAM 4 GB or more
  - Hard Disk 500 GB or more
  - Monitor 15 inch or above
  - Keyboard Standard Keyboard
  - Mouse Standard Mouse
  - Internet Connection Required for online access

- **Software Requirements:**
  - Operating System Windows 10 or above
  - Programming Language Java / JavaScript
  - IDE VS Code / IntelliJ IDEA
  - Database MySQL / localStorage
  - Browser Chrome / Edge
  - Version Control Git (optional)
  - Tools Node.js, npm

Abstract: **ProTutor** is a full-stack, AI-powered learning platform designed to improve students' academic performance by bringing all learning tools into one place. Instead of using multiple platforms for studying, practice, and doubt-solving, students can access everything through a single, user-friendly system.

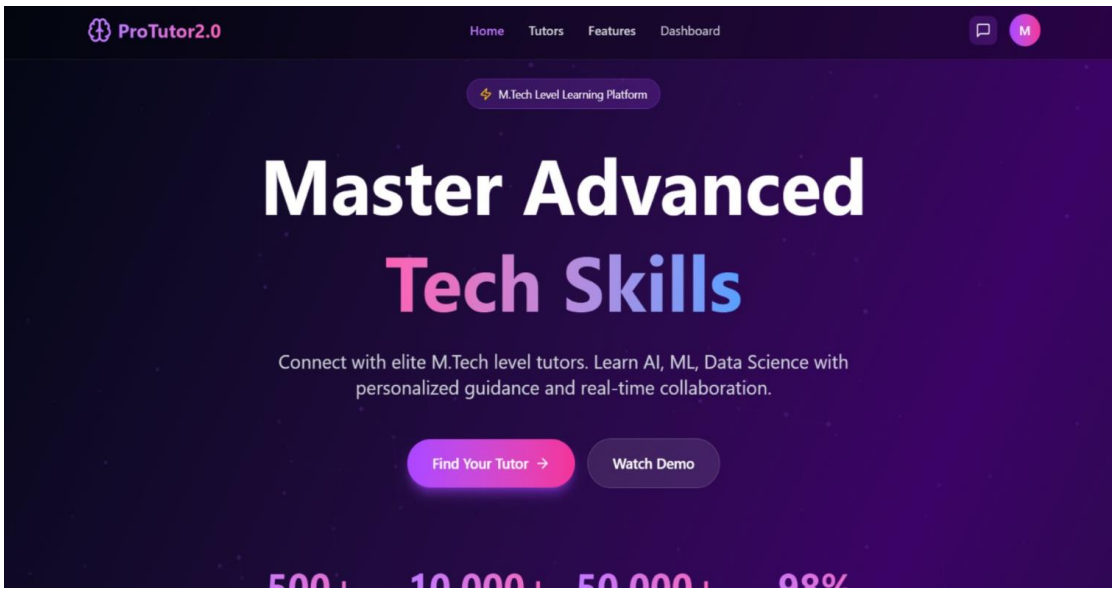
The platform is built using the PERN stack (PostgreSQL, Express.js, React.js, Node.js), ensuring scalability and reliability. It offers features like AI-based doubt

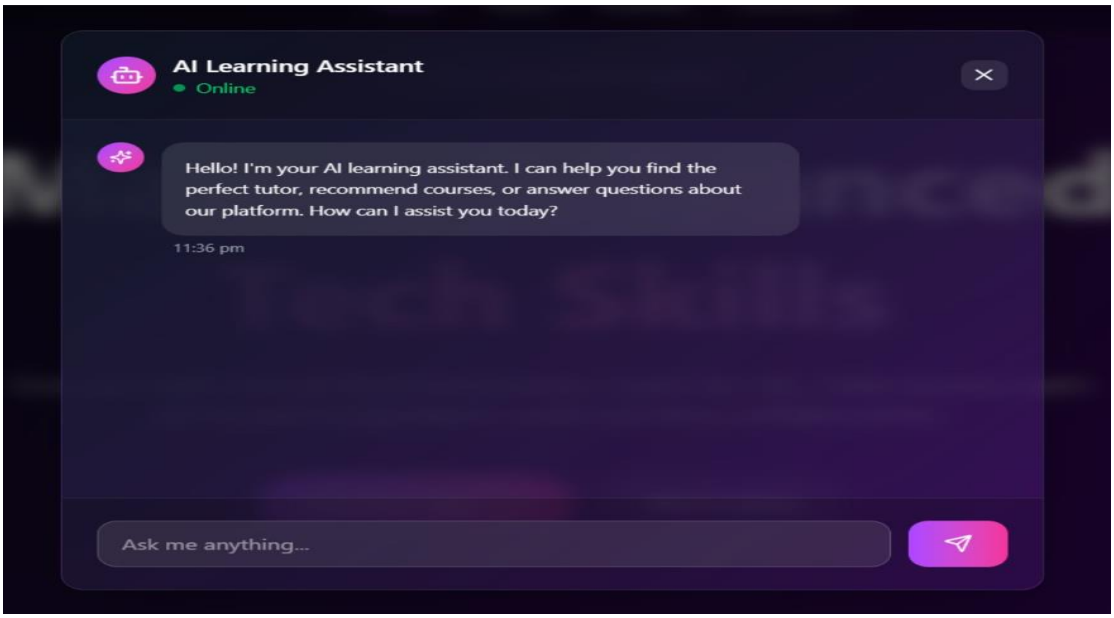
solving, automated quiz generation, smart study content, and performance analytics to track progress. It also provides resume guidance for career support.

ProTutor follows a SaaS model, where users can sign up securely and access a personalized dashboard. Free users have limited features, while premium users get advanced tools through subscriptions or credits.

Overall, ProTutor is a complete full-stack project that combines modern technologies and AI to provide an efficient and practical learning solution.

Outcome:





AI Learning Assistant
Online
Hello! I'm your AI learning assistant. I can help you find the perfect tutor, recommend courses, or answer questions about our platform. How can I assist you today?
